

CYCLE DISC BRAKES

EBC Brakes offers three pad compounds for your mountain bike:

Green Coded X-Country Compound - No Suffix

EBC Brakes X-Country mountain bike brake pads are an all round pad for trekking, cross country use or riding for pleasure. This compound is the perfect choice if you are unsure which type of pad is best for you.

Where the brake disc is unhardened and the use of a resin pad is recommended, this range of EBC Brakes X-Country mountain bike replacement brake pads is the perfect choice due to low disc abrasion features and it delivers long lifetime and excellent stopping power.

Red Coded Downhill Compound -"R" Suffix

"R" suffix brake pads are designed for downhill use and are extra high in friction. Lifetime is quite short but performance is great with low disc damage and very little heat transfer into the hydraulics.

EBC Brakes "R" suffix mountain bike replacement brake pads are an organic compound suitable for use on all disc types. Some brake systems use nylon or plastic fluid lines which are prone to softening and swelling when overheated. Sintered pads are not suitable for use with these systems as they generate too much heat, therefore we recommend using the "R" suffix brake pads.

Gold Coded Double-H Sintered Compound For Wet Riding - "HH" Suffix

Double-H™ sintered brake pads last much longer than organic brake pads because they have a higher friction rating and give longer life and better brake performance and are therefore great value for money. These high quality brake pads are made in the USA and are used by some of the world's greatest mountain bike sportsmen.

This compound is not suitable for use with a mountain bike where the discs are for use only with resin pads - EBC Brakes® Double-H™ replacement mountain bike brake pads will score the unhardened brake discs.

All EBC Brakes replacement mountain bike brake pads are made using magnetic stainless steel backing plates. Where required, EBC Brakes mountain bike brake pads come with improved strength retraction clips.

CYCLE BRAKE ROTORS

VR SERIES "VEE" ROTOR - Standard Size Replacement Brake Rotor

- Premium heat treated stainless steel
- Diamond ground surface finish
- Ultra lightweight Vee profile for better braking
- Suitable for use with any type of brake pad
- International standard 160 mm Ø / 6 bolt fitting

This EBC brake rotor is a direct size for size replacement for any disc brake system fitted with an IS 160mm size original rotor.

Order part number VR160.

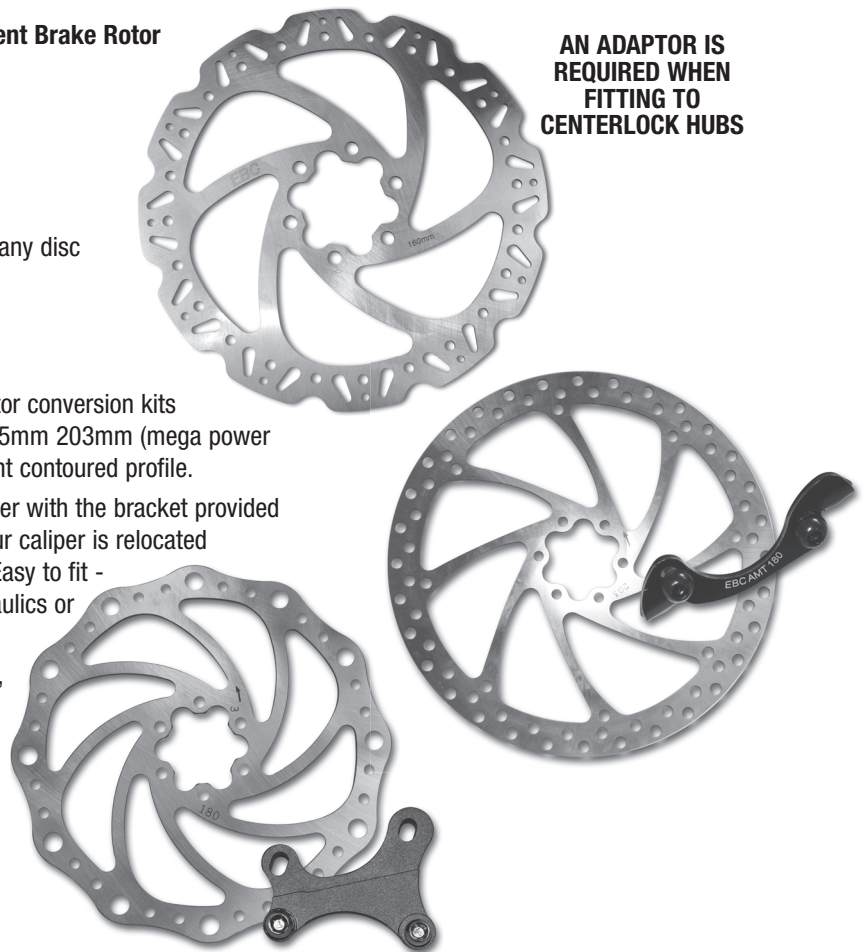

OVERSIZE BRAKE ROTOR KITS

EBC offers two upgrade options with these oversize brake rotor conversion kits - 160/165mm-180mm (medium power upgrade) and 160/165mm-203mm (mega power upgrade) and the option of full circle profile or new lightweight contoured profile.

These mount on most standard 6 bolt wheel hubs and together with the bracket provided fit most forks with 50mm IS mount or 74mm post mount. Your caliper is relocated outwards giving you a stronger brake and better brake feel. Easy to fit - no other changes are necessary to your caliper, cables, hydraulics or lever. All you need are two allen keys.

These are premium quality heat treated stainless steel rotors, diamond ground and compatible with every type of mountain bike brake pad. Kits are available to convert standard 160/165mm up to 180mm

(order part number MTBD160-180 for circle profile or MTBD160-180C for contour) or 160/165mm to 203mm or 180mm to 203mm (order part number MTBD160-203 for circle profile or MTBD160-203C for contour).

AN ADAPTOR IS
REQUIRED WHEN
FITTING TO
CENTERLOCK HUBS
